Batch Number	2111579	Product Name	Zyglo ZL-60D Water Washable Fluorescent Penetrant
Date of Manufacture	29/11/2021	B.B.E.	11/2026

Specification: Ion Testing Results

Test results obtained were as follows:

Test	Section	Limit	Result
Sulphur Content			4
Halogen Content			99

Specification: AMS 2644 Test results

Meets the requirements of Rolls Royce RRP 58003 (CSS 232), SAFRAN Pr 5000 / In 5000B, AMS 2644H and ASTM E 1417/E 1417M-16 Paragraph 5.1& 6.5.1.

Penetrant brightness tested according to ASTM E 1135.

When tested according to paragraph 4.3.2 of AMS 2644H the following results were obtained:

Test	Section	Limit	Result
Flashpoint (SMT 14)	3.3.3	93°C Min	104.5
Kinematic Viscosity (SMT 17)	3.3.4	8.81 - 11.91 cS	10.74
Fluorescent Brightness	3.3.8.3.2	Minimum 80%	99.37
Water Tolerance (SMT 2)	3.3.8.5	5.0% Minimum	27.27
Removability	3.3.8.6	Equal to or less than standard	Passed
Water Content (SMT 18)	3.3.8.7	1.0% Max	0.17

Specification: Pratt & Whitney Test Results

This is to certify that paragraph number 1 + 5 apply to the shipment described below (Insert at least one of the first 4, plus 5 if applicable)

- (Applicable to all raw material, to parts made from raw material furnished or purchased by vendor, or to assemblies of which some or all components are made from raw materials furnished or purchased by vendor) Material, parts, or components of assemblies have been inspected & accepted to the specifications involved, & results of tests required by PWA are as shown herein.
- (Applicable to parts or assembly components made from raw material furnished by PWA and not chemically or metallurgically treated by vendor so as to change surface or internal condition significantly) Parts or assemblies have been machined or formed from material furnished by PWA to make these parts or components of assemblies.
- (Applicable to parts or assembly components made from raw material furnished by PWA and chemically or metallurgically treated by vendor to change surface or internal condition significantly) Parts or components of assemblies have been made from raw material furnished by PWA to make these parts or components of assemblies. Parts, components of assemblies, or assemblies have been inspected and accepted to the specifications involved, and results of tests required by PWA are as shown herein.
- (Applicable to repaired or reworked raw material, parts or assemblies) The raw material, parts or assemblies have been reworked or repaired in accordance with PWA instructions, and are the same material, parts or assemblies returned for such reworking or repair, except for replacement of assembly components, in which case paragraphs 1 & 5 are also applicable.
- (Applicable to all assemblies, and to parts when specifically, authorised by purchaser) Results of all chemical and physical tests not shown below as well as all other evidence which shows acceptability of raw materials & assembly components, are on file and available for inspection at any reasonable time.

PAW Heat Code:

Test	Section	Limit	Result
Chloride Content		</=400ppm	94
Fluoride Content		</=50 ppm	5
Sulphur Content		</=1000ppm	4
Sodium (SMT 44)		</=100ppm	99
Kinematic Viscosity (SMT 17)		8.81 - 11.91 cS @38°C	10.74
Flashpoint (SMT 14)		93°C Minimum	104.5
Fluorescent Brightness		Minimum 80%	99.37
Separation of Constituents - Homogenous		None	Passed
Water Content (SMT 18)		<1%	0.17

--- EOR ---

Notes:

1. Our batch number appears on the label of bulk containers. Aerosols have batch numbers printed on bottom of the container. Bulk materials have a minimum shelf life of 5 years from date of manufacture. Aerosols have a minimum shelf life of 3 years from date of manufacture.
2. Most specifications require test results stated in percent, but some require parts per million (ppm). To convert "percent" figures to "parts per million" move the decimal four places to the right.
3. MIL-STD-271, MIL-STD-2132 and ASME Sec V, all require that materials be subject to a procedure to evaporate off volatile solvents before analysis for Sulfur and Halogens. According to these specifications, only those residues higher than 0.005 g/100ml shall be analysed for Sulfur and Halogens. Lower residues shall be reported.
4. The above certification gives the results obtained at the time of manufacture. Age and use may alter the properties of any material.
